

# MACROSPEC IS

Sequestering iron salt EDTA

**MACROSPEC IS** is a high efficiency sequestering iron salt.

## Properties

**MACROSPEC IS** is an EDTA-based (Ethylenediamine tetraacetic acid) organic complexing agent with highly powerful action on iron which eliminates the stains caused by this metal. **MACROSPEC IS** acts on water hardness turning water soft. It also solubilises precipitated metallic hydroxides.

## Typical Analysis

Physical aspect: White hygroscopic powder

Ionic character: Anionic

PCP: Free

EDTA content (%): 86 - Minimum

pH (Aqueous Sol. 1% w/v): 10.0 - Minimum

## Application

It is recommended to use **MACROSPEC IS** as follows:

### In tanning

0.3 - 0.5% calculated on the weight of the limed pelts

### In retanning

0.3 - 0.5% calculated on the weight of the limed pelts

### **Storage**

**MACROSPEC IS** must be stored in tightly closed packaging in a clean, dry, aired place protected from sunlight for a period not exceeding twelve (12) months.

### **Presentation**

**MACROSPEC IS** is available in powder form, packed in 25 kg bags (net weight). It may also be supplied in bulk or pallets.

### **Toxicological Information**

Please refer to the relevant **MSDS** (Material Safety Data Sheet) which may be found in our website. Alternatively, please contact our Sales Department.
