

SOFTANNIN

NATURAL POLYMERIC AGENT

SOFTANNIN is a natural polymeric agent with special properties that improve softness on the leather process maintaining the final characteristic of the leather.

Properties

SOFTANNIN acts deeply on the leather fibres and can be applied in different type of articles. **SOFTANNIN** maintains characteristics as good buffing and embossing property. The balanced formula of **SOFTANNIN** provides an exceptional softness to the leather, permitting inclusively high reduction of fatliquoring agent. **SOFTANNIN** is soluble in water.

Typical analysis

Physical aspect: Hygroscopic, dust-free, light beige colour

Ionic character: Anionic

PCP: FREE

Active matter (%): 93.5 - Minimum

Humidity at the time of packing (%): 6.5 - Maximum

pH (Aqueous Sol. 20 % w/v): 4.9 – 5.5

Stability to electrolytes: Good

Application

SOFTANNIN may be used either on its own or in combination with other vegetable, synthetic and/or auxiliary extracts.

It is recommended to use as follows:

Upholstery over chrome tanning

2 % calculated on the shaved hide weight

Floater

4 – 6 % calculated on the shaved hide weight

Nappas

2 – 4 % calculated on the shaved hide weight

Metal Free

5 – 20 % calculated on the shaved pre-tanning weight

Storage

The properties of **SOFTANNIN** powder shall remain unchanged providing it is stored in a dry, aired place, in tightly closed packaging and protected from sunlight.

Presentation

SOFTANNIN is available in dust-free, powder form, packed in 25 kg bags (net weight). It may also be supplied in bulk or pallets.

Toxicological Information

Please refer to the relevant MSDS (Material Safety Data Sheet) which may be found in our website. Alternatively, please contact our Sales Department.
