

# SYNTAC CA

## Product for Filling Vegetable Soles

**SYNTAC CA** is a combination of polymers, inorganic salts and complexing agents.

### Properties

**SYNTAC CA** is recommended to increase the yield and complement the fixation of vegetable extracts. It is suitable for all types of sole leather and saddlery. Its design allows rapid and complete absorption by the fibers, keeping an uniform colour and good buffability of soles and saddlery.  
**SYNTAC CA** is soluble in water.

### Typical Analysis

Aspect: White powder  
Ionic character: Anionic  
pH (Aqueous Solution 10% w/v): 2.0 – 3.0

### Application

**SYNTAC CA** is applied over shaved weight about 30 minutes in drum with 17 to 20 rpm.

It is recommended to use **SYNTAC CA** as follows:

**Soles / Saddlery:** 2 - 4 % calculated on the shaved weight

**Storage**

The properties of **SYNTAC CA** shall remain unchanged providing it is stored in a dry, aired place, in tightly closed packaging and protected from sunlight.

**Presentation**

**SYNTAC CA** is available in powder form, packed in 25 kg bags (net weight). It may also be supplied in bulk or pallets.

**Toxicological Information**

Please refer to the relevant **MSDS** (Material Safety Data Sheet) which may be found in our website. Alternatively, please contact our Sales Department.
