

WEIBULL CW

Dispersing Agent for Dark Colour Dyeing

WEIBULL CW is a vegetable-synthetic retanning agent with high dispersing power that imparts soft feel and firm grain.

Properties

The balanced formula of **WEIBULL CW** provides exceptional colorants and other retanning agents dispersion. The use of this product in leather dyeing processes results in even shades of colour without reducing their intensity. **WEIBULL CW** works in depth and goes through the whole thickness of the hides. **WEIBULL CW** acts on fatliquoring thus improving its exhausting. **WEIBULL CW** is soluble in water.

Typical analysis

Physical aspect: Hygroscopic, dust-free, Dark brown powder

Ionic character: Anionic

PCP: FREE

Active matter * (%): 93.5 - Minimum

pH (Aqueous Sol. 20 % w/v): 4.0 – 5.0

* When packing.

Application

WEIBULL CW may be used either on its own or in combination with other vegetable, synthetic and/or auxiliary extracts.

It is recommended to use **WEIBULL CW** as follows:

Calculated on the weight of the limed hides

1 – 4 % as a dispersant of vegetable extracts in tanning

Calculated on the weight of the shaved hides

2– 6 % chromed leather retanning agent

Storage

WEIBULL CW must be stored in tightly closed packaging in a clean, dry, aired protected from sunlight for a period not exceeding twelve (12) months.

Presentation

WEIBULL CW is available in dust-free, powder form, packed in 25 kg bags (net weight). It may also be supplied in bulk or pallets.

Toxicological Information

Please refer to the relevant MSDS (Material Safety Data Sheet) which may be found in our website. Alternatively, please contact our Sales Department.
